

# Top Actors based on the highest rated IMDB movies

Gunasekar Koppula

## Question

Who is the actor/actress that has made most appearances in the top 250 rated movies according to IMDB ?

Is that actor/actress a Hollywood star or from a different language?

## Methods

In this project I used requests module to get the webpage.

I used beautiful soap to parse through the html web page and get the actors details

## Results

The bar graph depicts the top 11 actors based on the analysis on the top 250 IMDB rated movies

## Conclusion

Evaluation of the graph shows that Robert De Niro is the actor with the highest number of movies(8).

It looks like actors with top rated movies are famous among the audience.

It is interesting to see an Indian actor in the 8th position he is the only non English language actor.
