

Top Actors based on the highest rated IMDB movies

Gunasekar Koppula

Question

Who is the actor/actress who has made most appearances in the top 250 rated movies of IMDB ?

Is the actor a Hollywood star or actor from a different language?

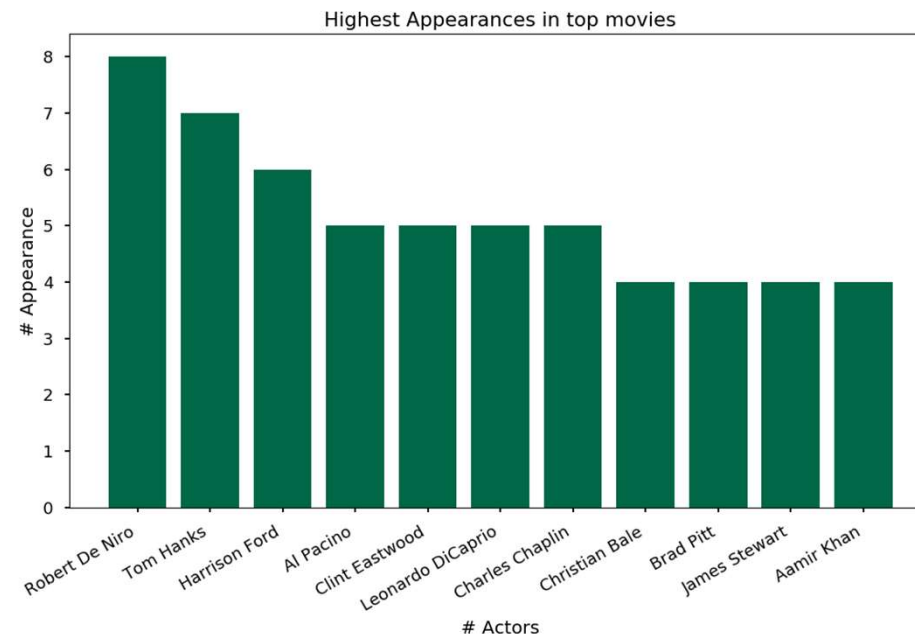

Methods

In this project I used requests module to get the webpage.

And used BeautifulSoup to parse through the html webpage and get the actors details

Results

The bar graph depicts the top 11 actors based on the analysis on the top 250 IMDB rated movies

Conclusion

Evaluation of the graph shows that Robert De Niro is the actor with the highest number of movies(8).

It looks like actors with good movies are considered good actors.

It is interesting to see an Indian actor in the 11th position he is the only non English language actor.
